

PARTH MULIK

Kolhapur, Maharashtra

+91 9130314018 — parthmulik36@gmail.com — GitHub — LinkedIn — LeetCode — CodeChef

Technical Skills

- **Languages:** C++, Python, JavaScript, SQL
- **Frontend:** React.js, HTML, CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, Authentication, Redis
- **AI / ML:** NLP, LLM APIs, Semantic Search, Machine Learning
- **Databases & Caching:** PostgreSQL, MySQL, Redis
- **DevOps & Cloud:** Docker, CI/CD, Git, GitHub Actions, Linux, AWS
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS.

Projects

AI Powered ATS Resume Analyzer

React.js, Node.js, PostgreSQL, Redis, NLP, LLM APIs

- Built an **AI-powered ATS resume analysis platform** processing **500+ resumes**, improving **semantic job matching** accuracy by **30%** compared to traditional keyword-based filtering.
- Developed scalable **REST APIs** for **resume parsing**, **ATS scoring**, skill-gap analysis, and AI-generated recommendations, reducing end-to-end processing latency by **40%**.
- Engineered an **NLP pipeline** for **PDF parsing**, structured data extraction, and preprocessing, achieving **90%+** accuracy across diverse resume formats.
- Containerized backend services using **Docker** and automated **CI/CD pipelines** which reduced deployment overhead by **70%**.

Scalable Distributed Task Queue

Node.js, Express.js, Redis, PostgreSQL, Docker

- Built a **distributed task queue system** supporting **10,000+ asynchronous jobs** with priority scheduling, retry mechanisms, and dead-letter queue handling for fault-tolerant background processing.
- Engineered scalable worker pipelines using **Redis queues** and optimized job persistence with **PostgreSQL**, reducing task execution latency by **45%** through concurrent worker processing.
- Containerized services using **Docker** for scalable deployment across distributed worker nodes.

Experience

AI Intern – Infosys Springboard (Virtual)

Aug 2025 – Oct 2025

- Converted **15+ product requirements** into **AI development workflows** for implementation.
- Improved application robustness by **35%** through **validation**, **debugging**, and edge-case handling.
- Accelerated development by **25%** by refactoring core modules for **maintainability**, modularity, and execution efficiency.

Key Project: AI-Powered Regulatory Compliance Checker

- Built an **AI-driven compliance platform** processing **100+ contract documents**, reducing manual review effort by **60%** using **LLM-based clause extraction**, **compliance validation**, and **risk detection**.
- Accelerated compliance review turnaround by **40%** through automated **contract parsing**, document analysis, and risk-flagging workflows.
- Integrated document export, email notifications, and reporting workflows for scalable compliance management.

Leadership & Achievements

- Won **2 hackathons** among **500+ competing teams** by building AI and software engineering solutions.
- Selected as Contributor for **GirlScript Summer of Code 2026 (GSSoC'26)** and **Social Summer of Code 2026 (SSOC'26)**.
- Solved **300+ algorithmic problems** across LeetCode and CodeChef.
- Ranked among the **Top 10** students in the ECE branch at VIT Bhopal.
- Led initiatives as **Resource Lead** at Insights Club and **Technical Lead** at Marathi Club.

Education

VIT Bhopal University

B.Tech in Electronics and Telecommunication

2024 – 2028 (Expected)

CGPA: **9.20**
